(54) Title: **CIRCUIT ARRANGEMENT FOR A DISPLAY DEVICE WHICH CAN BE OPERATED IN A PARTIAL MODE**

(57) Abstract: The invention relates to a circuit arrangement for controlling a display device (2) which can be operated in a partial mode, comprising a row drive circuit (4) for driving n rows of the display device (2) and a column drive circuit (3) for driving m columns of the display device, wherein the row drive circuit (4) controls the n rows of the display device sequentially from 1 to n, and the column drive circuit (3) supplies column voltages to the m columns, which voltages correspond to the picture data to be displayed of pixels of the controlled row. The invention further relates to a display device with such a circuit arrangement, an electronic appliance with a display device, and a method of realizing a partial mode. To keep the construction for realizing a partial mode simple, it is suggested that a logic function is connected in front of

at least one output of the row drive circuit (4), to which function a first control signal ( $R_E$ ) is supplied which achieves a deactivation of all row outputs ( $Z_1$  to  $Z_n$ ) of the row drive circuit (4) in the case of a row ( $Z_3, Z_4$ ) that is not to be displayed, and an activation of all row outputs ( $Z_1$  to  $Z_n$ ) in the case of a row ( $Z_1, Z_2, Z_5$ ) that is to be displayed. This renders it possible to realize a partial mode through the supply of only a single control signal ( $R_E$ ) to the row drive circuit without the second control signal ( $R_P$ ) necessary for controlling the rows having to be deactivated for the rows not to be displayed in the partial mode in the process of controlling the consecutive rows in the row drive circuit.

# INTERNATIONAL SEARCH REPORT

In **national Application No**  
**PC 03/02763**

**A. CLASSIFICATION OF SUBJECT MATTER**  
**IPC 7 G09G3/36**

According to International Patent Classification (IPC) or to both national classification and IPC

**B. FIELDS SEARCHED**

Minimum documentation searched (classification system followed by classification symbols)  
**IPC 7 G09G**

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

**WPI Data, PAJ, EPO-Internal**

**C. DOCUMENTS CONSIDERED TO BE RELEVANT**

Category °	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.

☒ Patent family members are listed in annex.

**° Special categories of cited documents :**

- "A" document defining the general state of the art which is not considered to be of particular relevance
- "E" earlier document but published on or after the international filing date
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- "P" document published prior to the international filing date but later than the priority date claimed

- "T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- "X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- "Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- "&" document member of the same patent family
